I hope all is well;

There are some major concern about the manuscript entitle: Solving Pallet loading Problem with Real-World Constraints follow as:

- 1- Introduction is so short. please develop introduction and mention correctly research important in fact you should mentioned in this section that why Solving Pallet loading Problem is important. Also, you should mentioned research contribution, objective and main question. finally you should add paper organization.
- 2- I think that in the introduction missed references. Please use new references during 2022-2023.
- 3- More related studies in the literature review is needed.
- 4- I think that finding section is missed. you should run proposed methodology in a real problem.
