

# Review of: "Enhancing Academic Speaking Skills: An Immersive Virtual World Approach"

Guoliang Zhang

Potential competing interests: No potential competing interests to declare.

This study employs a mixed-methods approach to examine the effectiveness of VR in promoting the student's learning experience and language ability in EFL. The following suggestions are made for the authors' reference: (1) The content of the literature review should be condensed to remove irrelevant information and elicit research questions. (2) Adding an experimental flow chart is essential for understanding the experimental process.
