

# Review of: "Identifying Psychological Distress Patterns during the COVID-19 Pandemic using an Intersectional Lens"

Francesco Bruno

**Potential competing interests:** No potential competing interests to declare.

Thank you for the opportunity to review this manuscript. Given the vastness of the topic, I suggest the authors to enrich the references in introduction and discussions. I am perplexed by the use of the instrument to measure psychological distress. I suggest authors doing a factor analysis on this and calculating cronbach's alpha.
