Potential competing interests: No potential competing interests to declare.

As I mentioned before, it is an exciting paper. However, it needs amending in some parts.

1. The authors need to state the contribution of the paper clearly.
2. The paper needs a separate section for the literature review.
3. The references need to be updated. We need more recent articles, books, and scholarly sources.
4. There is no separate discussion section, which is necessary.
5. The authors must mention the questions of their survey.
