

Review of: "Investigation of Mechanical Properties of Sisal Fiber and Sugar Palm Fiber Reinforced Hybrid Composites"

Vivudh Gupta

Potential competing interests: No potential competing interests to declare.

1. The authors are advised to summarise the Introduction section in 3-4 lines and present the research gap thereafter conducting a literature review.
2. The authors should present the detailed process of extraction of fibers from sisal and palm for better understanding of the reader.
3. The compression moulding set-up must be added as a figure.
4. Proper justification for results obtained after various tests, with validation from previous existing literature, is missing.
5. The authors must add pictures of set-ups for various tests used in this study.
6. Fractography analysis via SEM is missing.
7. The scope for future work from this study must be added.
