VEGF Mixed-Backbone Antisense Oligonucleotide GEM 220

National Cancer Institute

Source

National Cancer Institute. *VEGF Mixed-Backbone Antisense Oligonucleotide GEM 220*.

NCI Thesaurus. Code C2016.

A mixed-backbone antisense oligonucleotide that is complementary to a pro-angiogenic vascular endothelial growth factor (VEGF) mRNA sequence. Because of its antiangiogenic properties, GEM 220 has been studied as a potential antineoplastic agent. (NCI04)
