**Potential competing interests:** No potential competing interests to declare.

The subject matter of the paper is very much suitable for the present-day context. The paper has discussed both pros and cons very well. Being a faculty member in a HEI, I find it challenging to teach, to set question papers, and to conduct exams in the presence of these bots. The paper is well written, but the challenges and mitigation of challenges might have been discussed a little more elaborately. This is my opinion on the paper. Otherwise, it is fine.
