Potential competing interests: No potential competing interests to declare.

The manuscript entitled "Nanocarriers for Protein and Peptide Drug Delivery" is a review of the development of structure-based nanocarriers for drug delivery which have potential to address the limitations associated with protein and peptide drug delivery.

The review is clear and concise. Conclusions section is informative and show some criticism and perspectives. There are a few points to clarify/change.

1 - Please, improve the captions and the quality of the figures 1 and 2.

2 - Please add some information of the selected papers and the years covered by the review.
