# Minimum Viable Innovation Framework (MVI Framework)

Colin Keogh<sup>1</sup>

<sup>1</sup> University College Dublin

**Potential competing interests:** The author(s) declared that no potential competing interests exist.

The Minimum Viable Innovation Framework (MVI Framework) is a framework ranking the technical functionality of new innovations (product, service, societal etc.) to solve a desired problem, on a purely technical basis from Concept (Minimum Functional Concept (MFC)<sup>[1]</sup>, through Design (Minimum Functional Design (MFD)<sup>[2]</sup> to final Product (Minimum Functional Product (MFP)<sup>[3]</sup>.
