Zinc Oxide/Aluminum Starch Octenylsuccinate/Glycyrrhetic Phytosome/Vitamin E/Botanical Extracts-Based Skin Protectant Paste

National Cancer Institute

Source

National Cancer Institute. *Zinc Oxide/Aluminum Starch Octenylsuccinate/Glycyrrhetic Phytosome/Vitamin E/Botanical Extracts-Based Skin Protectant Paste*. NCI Thesaurus. Code C97919.

A paste containing multiple skin protectants with anti-oxidant, skin protecting, moisturizing, anti-erythema and anti-inflammatory activities. The paste includes zinc oxide, aluminum starch octenylsuccinate, lanolin, allantoin, chamomile and sweet almond oil, rice bran oil, shea butter, dimethicone (polymerized siloxane), petrolatum, vitamin E, phytosome of glycyrrhetic acid and botanical extracts derived from *Calendula officinalis*, *Malva sylvestris* and *Tilia tomentosa*. Upon application, this paste provides a physical barrier on the skin and may help protect, soothe and moisturize the skin as well as restore skin softness, integrity and elasticity. When this paste is applied to the perineum area, it may help prevent radiation-induced dermatitis.
