Title: Results in cone metric spaces and related fixed point theorems for contractive type mappings

The purpose of this article is to establish some fixed point results for contractive type mappings in cone metric spaces. Examples are provided to support results and concepts presented herein. As an application of our results, we deduce other established fixed point theorems in cone metric spaces.

I see this paper is good, organized, and well-written. Also, it contains new important theoretical results. Moreover, it attracts the attention of many researchers. I see this paper is very interesting, organized, and contains many important new results in the technique of fixed point, which is important to many researchers.

 So, I think this paper is very good for publication in **Qeios**.

Kind regards,

Ahmed Nafea
