

Review of: "Spatio-Temporal Analysis of Precipitation Patterns in Xinjiang Using TRMM Data and Spatial Interpolation Methods: A Comparative Study"

Esmail Jaihouni

Potential competing interests: No potential competing interests to declare.

In this study, the authors compare four spatial interpolation methods. Also, they analyzed trends in precipitation in a region in China.

1. Introduction is weak; please support it with extra references. You can find better information (doi.org/10.1007/s12517-022-09848-z) (doi.org/10.1007/s12665-019-8283-3)
2. The research gaps should be summarized in the introduction.
3. Figures have some Chinese words. Please write them in English.
4. In 2.1.2, you mentioned the preprocessing of data. Please clarify what you did for preprocessing.
5. Please provide a flowchart for your work.
6. Please explain the novelty of the work.

In summary, this manuscript is fine. It can be accepted after some necessary revisions.
