

Peer Review

Review of: "The Development of Differentiation-Based Therapy for Breast Cancer Using EDAR and XEDAR Signalling Pathways: A Conceptual Framework"

Osayamen Igunma¹

1. Epidemiology, University of Alabama at Birmingham, United States

I enjoyed reading this article. The writer did a fantastic job making all the sections clear and easy to follow. The objectives were clear, and the results answered the research questions based on the aims and objectives. Figures were clear and made the review easy to understand. Overall, the author did a good job, and the paper is of high impact.
