Potential competing interests: No potential competing interests to declare.

The article is impressive in many ways. It is direct and plainly written. Everyone can understand the messages from this concise article. The title is direct. The introduction is clearly written. The way the hypotheses are developed and formulated in this article is sound. I am comfortable with the literature. It seemed small as per the conventions but has addressed the points. The methodology is clearly presented. Results are shown precisely, despite the formatting that is needed. The implications are direct and targeted. The discussion is adequate. All in all, the article met the very essence.
