Dear Authors,

We apologize for our delay in reviewing this article.

In general, this research article is interesting. To complete this article, please revise:

1. In the abstract, reveal the research method, results and findings achieved, and a brief conclusion.
2. What is the aim of this research on livelihood vulnerability? The purpose needs to be elaborated. At the end, ask the problem, additional benefits of this research. To assess the vulnerability of community livelihoods in the context of climate change, what climate change parameters are used? For example, what parameters are air temperature, sea water temperature, rain, wind, air pressure, or climate parameters?
3. In the research method, it is called extreme weather. This method needs to be elaborated in relation to the ecological economic model. To assess the vulnerability of community livelihoods in the context of climate change, what climate change parameters are used? In the method, it is necessary to describe the parameters of extreme weather phenomena as in Table 3.2. In the research method, it is also necessary to add research stages that explain the results shown in Tables 3.1 to 3.4 and other tables.
4. Apart from outside Binh Dai, Ba Tri, Ben Tre, this research has never been carried out in other locations. If there are, these findings can be confirmed by the same or similar research that has been carried out in other locations, either within the country or abroad.
5. Make sure your conclusions are valid according to the objectives achieved, which are associated with climate change.

After reviewing this article, we decided to make minor revisions.

Thank you for your trust and cooperation in reviewing this article.

Best Regards,

Reviewer
