*Thank you for giving me the opportunity of reviewing this interesting article.*

I have provided my comments as follows.

- Title: "under-18s", if it is "under 18 years old", it will look more professional
- Introduction: kindly add a note on rationale of the study
- Methods: English revision required for the methodology part. Entire methodology seems little confusing
- Discussion: Try to rearrange the discussion part
- Some findings are compared with findings of other studies, but not justified. Please provide justification for the all the significant findings.
- What can be the reason to reject the hypothesis? Add a note on that
- Is there any recommendation for future research?
