Dear Editor,

Attached is the reviewed copy of the manuscript including comments.

The manuscript has been well written but there are many grammatical errors ranging from short sentences that do not convey meaning, and tenses error. I have identified some of them and encourage the authors do diligently go through the thesis and correct all grammatical errors. Also there are some mathematical issues identified, authors could see them in the attached file and make corrections. So, I advice that major correction been carried out on the manuscript and returned for another round of review.
