Mixed Phenotype Acute Leukemia, T/Myeloid, Not Otherwise Specified

National Cancer Institute

Source

National Cancer Institute. *Mixed Phenotype Acute Leukemia, T/Myeloid, Not Otherwise Specified*. NCI Thesaurus. Code C82213.

A rare mixed phenotype acute leukemia in which the blasts express T-lymphoid and myeloid lineage markers but are negative for MLL translocation and t(9;22)(q34;q11.2) translocation. The prognosis is usually unfavorable.
