

Review of: "Wolbachia endosymbionts in two Anopheles species indicates independent acquisitions and lack of prophage elements"

Michaël Luciano Tantely

Potential competing interests: The author(s) declared that no potential competing interests exist.

This interesting manuscript will worth publication after minor revision.

- 1) Before acceptation of the paper, double-check the abbreviation of genus *Anopheles* throught of the manuscript (for exemple, use "*An. gambiae*" instead of "*A. gambiae*", idem for *A. demeilloni*, *A. moucheti*, *A. funestus*)
- 2) The manuscript work on several complex species (*An. gambiae* and *An. marshalli*) and group of species (*An. funestus*). A special discussion on these complex and group should be added. For exemple, is *A. marshalli* you call here is the species of the *marshalli* complex or the main complexe?
- 3) line 188 "lower" or "decreased"?
