Potential competing interests: No potential competing interests to declare.

I read with great interest the manuscript, which falls within the aim of this Journal and offers a high-quality overview of the topic. The tables and figures are clear and interesting. Data analyzed are accurate and conclusions are supported by the data analysis.

Although the manuscript can be considered already of high quality, I would suggest taking into account the following minor recommendations:

- I suggest another round of language revision, in order to correct a few typos and improve readability.

- I find it interesting to include a reference to the screening programs for early diagnosis and treatment of gynecological cancers (Golia D'Augè T, Giannini A, Bogani G, Di Dio C, Laganà AS, Di Donato V, Salerno MG, Caserta D, Chiantera V, Vizza E, Muzii L, D'Oria O. Prevention, Screening, Treatment and Follow-Up of Gynecological Cancers: State of Art and Future Perspectives. Clin. Exp. Obstet. Gynecol. 2023, 50(8), 160. https://doi.org/10.31083/j.ceog5008160).
