**Potential competing interests:** No potential competing interests to declare.

The paper topic is interesting. However, the paper as a whole is not structured or organized well. There are many sections that are short in content or missing. The short or not clear sections such as the abstract, introduction, data collection and methodology, results, and references. The literature review section was also missing.

I suggest replacing the word research outlook with research recommendation for the last section. The paper language also needs to be edited.
