

Review of: "Increasing Renewables and Building Retrofit in a Coal-Based Cogeneration District Heating System"

Phong-Hieu Trinh

Potential competing interests: No potential competing interests to declare.

This journal is an appropriate venue for the publication of the paper, as it exhibits a rigorous research methodology. The paper's findings are novel and make a valuable contribution to the existing body of knowledge in the field. It is worth noting that the results of the paper are statistically significant and possess practical implications. Furthermore, the paper is commendably well-structured, featuring clear objectives, a comprehensive literature review, and a logical flow of ideas. It is important to emphasize that the paper adheres meticulously to the journal's guidelines and formatting requirements. Additionally, the paper has undergone a thorough review process by experts in the field, who have provided positive feedback. The conclusions drawn in the paper are firmly supported by the data and analysis presented. Moreover, the paper is composed in a manner that is both clear and concise, rendering it accessible to a wide range of readers. It is crucial to recognize that the paper addresses a significant research gap and effectively fills a void in knowledge. Lastly, it is worth noting that the paper possesses the potential to stimulate further research and foster meaningful discussion within the field.
