

Review of: "Views and Attitudes of Pharmacy and Medical/Dental Students Towards Inter-Professional Education and Collaboration in the United Arab Emirates"

ammar Riyad Mohi

Potential competing interests: No potential competing interests to declare.

To summarize the paper review points:

1. Idea was clear but needs to be specified in discipline explanations.
2. Authors deepened on tables (no schemes or figure images) as clinical facts evidence without outcomes in a significant values manner.
3. Processing of writing flow was valuable but excessively did not summarize these values simply, with a gap in the conclusion manner.
