Potential competing interests: No potential competing interests to declare.

The manuscript entitled "Medical students' disease status of COVID-19: A multicenter study" aimed to evaluate the status of COVID-19 among medical students. The manuscript can be improved after implementation of the following suggestions.

Title is not impressive. It should be rewritten.

Objectives are of research are missing in abstract.

Use of English language is not up to the mark.

COVID is an abbreviation. It should be written in capitalized form throughout the manuscript.

Statistical analysis is not mentioned clearly.
