Potential competing interests: No potential competing interests to declare.

- The conclusion and findings should be summarized in the abstract
- Literature reviews and references are ancient, 70% at least must be within the last 5 years.
- The data sampling proof is not exist, the study scope is not clear
- the data collection until 2019, so where is the recent figures?
- Author should clarify why chosen those Countries and groups
- Discussion part need further clarification
