The article titled "Role of Leadership with Equity, Integrity, Ethics, Humility, and Outstanding Culture in the Development of Engineering Institutions" provides a comprehensive overview of the role of leadership in the development of engineering institutions. The article is well-written and structured, with a clear focus on the importance of leadership attributes such as equity, integrity, ethics, humility, and outstanding culture. The research gaps identified in the article are appropriate, and the methodology used to address these gaps is sound. The article draws on a range of sources, including academic journals, industry reports, and case studies, to provide a comprehensive overview of the subject matter.

The results presented in the article are acceptable and provide valuable insights into the importance of leadership attributes in the development of engineering institutions. The discussion section is well-written and provides a thorough analysis of the findings, with a focus on the implications of these findings for engineering institutions and their leaders.

Overall, the article provides a valuable contribution to the literature on leadership in engineering institutions. The authors have done an excellent job of identifying research gaps and using a sound methodology to address these gaps. The results and discussion sections are well-written and provide valuable insights for leaders in engineering institutions.

However, one potential limitation of the article is the limited focus on specific leadership practices that can promote equity, integrity, ethics, humility, and outstanding culture. Future research could explore specific leadership practices and strategies that can be used to promote these attributes in engineering institutions.
