I have read and evaluated the paper titled "Ancient Trails of the Surigao Gold District: A Preliminary Baseline Predictive Model". My major concerns are as follows; The Abstract & Introduction part of the manuscript is not properly written.

1. The Abstract & Introduction part of the manuscript is not properly written. The Abstract & Introduction section should be revised carefully.
2. The aims and objectives of the present study are not clear from the Introduction section. The discussion is very limited.
3. Please emphasize the novelty of the manuscript.
4. Change the presentation style of all the Figures with proper layout view.
5. Figures caption are not properly illustrated.
