Potential competing interests: No potential competing interests to declare.

The following are the results of the review that I provided:

ABSTRACT

1. The abstract section does not contain a research objective.
2. The abstract section does not contain results and implications that show the success of the method.

INTRODUCTION

1. In the introduction section, the reasons or background of the author's choice of this theme have not been presented.
2. The existing arguments and statements are not based on relevant theoretical quotations.
3. The research method has not been explained in detail, such as observation.

"What steps need to be taken for observation, what is the sample, and how much is the sample?"

RESULTS

1. It has not been explained in detail how this method impacts the results of the research carried out.
2. Explanations of statistical graphs need to be explained in detail based on methods and theories relevant to the research.

CONCLUSION

1. In the conclusion section, it is necessary to include policy implications or suggestions related to the method.

REFERENCES

1. The bibliography should use literature references from the last 5 years.
