

Review of: "Stellate ganglion block for anosmia and taste disturbance due to Long-COVID"

Wahyuningsih Djaali

Potential competing interests: The author(s) declared that no potential competing interests exist.

In presenting the case, it is not explained in detail how the improvement in taste function has occurred, and what evaluation has been done. It is important to write this down to convince the reader that the improvement that occurred were the result of the SGB.

In the discussion is quite well explained.

Further research needs to be done in order to provide objective data regarding the role of SBG in these symptoms.
