Potential competing interests: No potential competing interests to declare.

I found the article very interesting for the attention to detail with which the comparison between the two methods was described. I have just a few editing tips:

- the letters in the caption in Figure 9 do not correspond to those on the image (d, e, f are missing);
- I suggest you increase the quality of Figure 13 where it is difficult to read labels;
- the text lacks a reference to Figure 15 and a comment on it.
