

# Review of: "Effective use of Waste Materials: A Case Study of Utilization of Fly Ash in Flexible Pavement Structures"

Ritwik Das

Potential competing interests: No potential competing interests to declare.

1. This paper provided results of some previous works only. A comparative analytical study on using fly ash in the base layer, as well as soil stabilization, in terms of the developed bonding mechanism responsible for improving the quality of the samples, needs to be explained.
2. Explanation is required for increasing the performance of asphalt concrete using fly ash as a filler material.
3. There is no Fig. 2 included in the manuscript. It should be checked.
4. The review recommends writing the paper in a compact way to improve the quality.
