**Potential competing interests:** No potential competing interests to declare.

## Strengths

The article covers a variety of topics related to *Rubus fraxinifolius*, including its nutritional composition, medicinal properties, and cultivation efforts.

Provides a detailed context regarding the significance of Ragimot in Sabah, Malaysia, both in terms of biodiversity and cultural and economic relevance.

Recent references and a variety of scientific sources support the information presented.

## Limitations and Potential Errors

Some sections may generalize the properties of Ragimot without clearly distinguishing between the species of *Rubus*. This could lead to an imprecise understanding of the specific characteristics of *Rubus fraxinifolius*.

The article could benefit from a more balanced discussion, addressing not only the positive aspects but also potential risks or limitations in the use of Ragimot.

While the article reviews existing studies, it is unclear whether new experiments or analyses have been conducted to validate the claims made, especially regarding the medicinal properties.

The discussion on the economic impact and sustainable cultivation practices could be further developed, particularly considering the importance of conserving native species.

The article could include a greater diversity of perspectives, especially from local communities that directly interact with the plant.

If the article suggests medicinal applications, it would be ideal to include more in-depth discussions on clinical studies or evidence supporting these applications.

## Conclusion

The article provides a comprehensive and informative view of *Rubus fraxinifolius*, highlighting its nutritional, medicinal, and

cultural importance. However, improvements in critical approach, discussion of limitations, and inclusion of multiple perspectives could further enrich the work. It is essential that future research or reviews consider these aspects to provide a more balanced and detailed understanding of Ragimot and its potential.
