Potential competing interests: No potential competing interests to declare.

- The abstract does not state the data used, the main results and the analysis to achieve the objectives.
- In the analysis, the results are less correlated with the analysis. the scenario for achieving the objectives is not explicitly stated. There should be information on land use change so that it is known that land function improvement is prioritized for land function restoration. As well as changes in population and behavior towards nature (anthropogenic) so that a number of concrete steps can be taken in order to reduce erosion and sedimentation
