

Review of: "The anti-staphylococcal activity of probiotic-contain gelatin and whey coatings on processed chicken breast"

Dibyajit Lahiri

Potential competing interests: No potential competing interests to declare.

1. The abstract needs to be reorganized since it starts very abruptly.
2. Nowadays should be written as Now-a-days in the first line of the Introduction.
3. "According to the harmful effects of chemical antimicrobials, using natural compounds such as essential oils and plant extracts or their derivatives in edible coatings and films has notably increased to enhance the shelf life of food products," this sentence needs rephrasing.
4. I think in Fig. 1, the Y-axis can be represented as log CFU/ml.
