**Potential competing interests:** No potential competing interests to declare.

The article presented in the review is interesting and contains a lot of important information. It is well-written, easy to read, and based on literature selected and analyzed by the authors.

I have a few comments to make it even better.

**Summary:** The authors should specify the purpose and methodology.

**Keywords:** The authors should use more specific keywords related to the article's content.

Figure 1 (Fig. 1. Most popular European destination for foreign tour operators) - it is unknown what it refers to. Specify.

The text lacks the locations of the figures shown in the article. Only figure 11 has its place in the text.

Some markings are missing on figures 9 and 10.
