REVIEW REMARKS

Title of the Article: Ancient Trails of the Aurigao Gold District A Preliminary baseline Predictive Model

Name of the Reviewer: Prof. K. Raghu Babu

Heading

Remarks

Abstract

Very brief, however good, the authors used term "Natural Band Combinations", There will be Visible bands, Infrared bands, Ultrared bands in a satellite imagery. This should be noted for future works.

Introduction

Good and well explained the background of the work done

Methods

The data used and techniques adopted for the work are sufficient and good.

Results

The analysis done by suing different band combinations is good, figures are good

Discussion

Though the discussion is simple, well explained the work done and analysis.

Secondary analysis

Well explained the future work to be done by the authors.

Reviewer comments

The work is very simple and insignificant in geological point of view, but the work signifies the archaeological base, this may be considered for publication
