Anti-gout Preparation

National Cancer Institute

Source

National Cancer Institute. *Anti-gout Preparation*. NCI Thesaurus. Code C29733.

Pharmaceutical Anti-gout Preparations such as colchicine, allopurinol, probenecid, and sulfinpyrazone contain natural or synthetic agents against gout, a condition characterized by increased uric acid accumulation. Anti-gout agents may reduce inflammation, stimulate elimination of uric acid, or increase production of uric acid. (NCI04)
