Dolichyl-Diphosphooligosaccharide-Protein Glycosyltransferase Subunit DAD1

National Cancer Institute

Source

National Cancer Institute. *Dolichyl-Diphosphooligosaccharide-Protein Glycosyltransferase Subunit DAD1*. NCI Thesaurus. Code C105734.

Dolichyl-diphosphooligosaccharide-protein glycosyltransferase subunit DAD1 (113 aa, ~12 kDa) is encoded by the human DAD1 gene. This protein plays a role in the addition of high-mannose oligosaccharides to asparagine residues.
