Epidermolysis Bullosa, Junctional, with Pyloric Atresia

National Cancer Institute

Source

National Cancer Institute. *Epidermolysis Bullosa, Junctional, with Pyloric Atresia*. NCI Thesaurus. Code C162474.

An autosomal recessive condition caused by mutation(s), in the ITGA6 or ITGB4 genes, encoding integrin alpha-6 and integrin beta-4 respectively. It is characterized by junctional epidermolysis and pyloric stenosis/atresia.
