# Malignant Mediastinal Germ Cell Tumor with Associated Hematologic Malignancy

National Cancer Institute

## Source

National Cancer Institute. *Malignant Mediastinal Germ Cell Tumor with Associated Hematologic Malignancy*. NCI Thesaurus. Code C45733.

An extragonadal non-seminomatous malignant germ cell tumor that arises from the mediastinum and is associated with a hematologic malignancy. The hematologic malignancies are clonally related to the malignant germ cell tumor and include acute leukemias, myelodysplastic syndromes, myeloproliferative neoplasms, and mastocytosis.
