# GAIA Level 1 Neonatal Infectious Meningitis

National Cancer Institute

## Source

National Cancer Institute. *GAIA Level 1 Neonatal Infectious Meningitis*. NCI Thesaurus. Code C127987.

GAIA Level 1 Neonatal Infectious Meningitis is defined by two criteria: first, the recognized pathogen must be identified, using a validated method, from cerebrospinal fluid (CSF); second, if an organism normally considered to be non-pathogenic is identified from the CSF, level 1 of diagnostic certainty additionally requires all level 2 criteria: i.e. CSF pleocytosis AND temperature criteria AND one or more clinical criteria.
