**Potential competing interests:** No potential competing interests to declare.

The provided research paper has the basic structure of a standard research paper, including sections such as an abstract, introduction, data analysis, conclusions, and references. However, there are some points to consider:

## 1. Abstract:

- The abstract provides a brief overview of the study, including the research objective, methodology (mentioning the use of CRISP-DM), and key findings. It mentions the impact of the marketing campaign on sales but lacks specific numerical results or statistical significance. Ideally, the abstract should briefly summarize the methodology, results, and implications, giving readers a clear understanding of the research findings.

## 2. Table of Contents:

The table of contents outlines the main sections of the paper, which is a good start. However, a standard research paper often includes more specific subsections, and the level of detail in the table of contents can vary depending on the paper's length and complexity. Here are some potential improvements to the table of contents:

- Introduction:
  - Background and context
  - Research objectives and questions
  - Significance of the study
  - Structure of the paper
- Literature Review (if applicable):
  - Review of relevant literature
  - Theoretical framework
- Methodology:
  - Data collection
  - Data preprocessing
  - Data analysis techniques (mention CRISP-DM here)
  - Hypotheses (if applicable)
- Data Quality Assessment:

- Methods for assessing data quality
- Data cleaning and preprocessing steps
- Discussion of data quality issues encountered
  
- Data Analysis:
  - Presentation of results
  - Statistical analysis (if applicable)
  - Data visualization
  - Interpretation of findings
  
- Discussion:
  - Interpretation of results
  - Comparison with previous research (if applicable)
  - Implications of the findings
  - Limitations of the study
  
- Conclusions:
  - Summary of key findings
  - Contributions to the field
  - Practical recommendations
  
- Recommendations:
  - Specific actionable recommendations based on the findings
  
- Future Research (if applicable):
  - Suggested directions for future research
  
- References:
  - List of all cited sources
