

Review of: "[Case Report] Profound Symptom Alleviation in Long-Covid Patients After PAMP-Immunotherapy: Three Case Reports"

Harleen Kaur

Potential competing interests: No potential competing interests to declare.

1. The paper generates curiosity, but lacks scientific reporting.
2. There is no documentary/photographic evidence of improvement.
3. Discussion lacks comparison with the existing standards of treatment of LC cases.
4. Questionnaire used is apparently self-made, and was not validated before use.
5. Limitations of immunotherapy and some explanation about 'repurposing of drugs' for some purpose other than the original must be included.
