Potential competing interests: No potential competing interests to declare.

1. The grammatical construct of the paper is poor and should be proofread by a professional
2. The abstract is incomplete as the protocol for groups G and H is not indicated
3. The authors should be consistent in the use of the botanical and generic names of strawberry
4. One format for grouping should be used. Either 1, 2, 3.... or A, B, C...
5. The results in Table 2 could be better presented to compare the oxidative stress parameters in all groups
6. In the column representing CAT, the values for groups F - H are missing
7. Neurobehavioral studies should be briefly explained in the methodology, including its relevance to the present study
8. The last two paragraphs should be moved to the methodology
9. Micrographs are not included in the manuscript
10. There was no extensive discussion comparing the present study to similar studies, and the results and their significance were not highlighted
