Review of: "Functional Information of a Driven Cellular Automaton"

Rawaa Dawoud Al-Dabbagh¹

1. Department of Computer Science, University of Baghdad, Iraq

This manuscript demonstrates clear writing, with the topic comprehensively examined and insightfully discussed. However, I have one essential comment.

The introduction is **overly lengthy**, with explanations that are **unnecessary**—particularly in the first paragraph. The authors should focus more directly on the main point of their work, presenting the research problem clearly and outlining the objectives concisely.
