Potential competing interests: No potential competing interests to declare.

Few observations: Authors can add if it fits with the journal guidelines. Now the paper is more standard than the previous one.

1. The title of the paper is interesting.
2. There is a long introduction, but not presented with any thematically relationship. The author can split this section into a literature review section. If possible, please mention why your study is important. Also, please state the problem statement and significance of your study.
3. There is no source of the tables used. Please mention the source of the tables used.
4. If possible, please add a section like the objectives and research questions.
