

Review of: "Evaluating the effect of shelf-storage, daylight, and air oxygen on the peroxidase-like activity of unmodified silver nanoparticles"

Maria Zafar

Potential competing interests: No potential competing interests to declare.

- 1- Abstract is not appropriate, please modify it.
- 2- The introduction section is not clear enough and it is difficult for the reader to find a
- 3- relation of ideas with the text in general. Authors are suggested to write a clear
- 4- introduction: Some references could be cited such as:
<https://link.springer.com/article/10.1007/s13399-022-02730-8>,
<https://www.tandfonline.com/doi/abs/10.1080/24701556.2023.2165681?journalCode=lsrt21>,
<https://link.springer.com/article/10.1007/s13204-021-02238-z>, <https://link.springer.com/article/10.1007/s10904-020-01504-x#:~:text=Effect%20of%20silver%20nanoparticles%20on,to%20reduce%20post%2Dharvest%20losses>.
- 5- Grammar check is required, and the sentence formation is inappropriate in many places.
- 6- The authors should compare their results with the results already reported in the literature and Novelty, if any, must be highlighted.
- 7- Purity of using materials must be clear.
- 8- Scientific level of the collected data is low. Scientific interpretation and discussions on these data are poor.
- 9- Please improve the figures and overall quality of papers.
- 10- Conclusion section needs improvements. Please add future recommendations in it.
