

Review of: "Impact of risk factor diabetes mellitus on patients with periodontitis"

Jaideep Mahendra

Potential competing interests: The author(s) declared that no potential competing interests exist.

TITLE: IMPACT OF RISK FACTOR DIABETES MELLITUS ON PATIENTS WITH PERIODONTITIS

- Overall, the manuscript is well written. However, a few corrections need to be addressed.
- Certain aspects that would still have added significance to the manuscript such as evidence suggesting the indications and need for various therapeutic approaches depending on the glycemic status of the patient and their outcomes, the need for an antibiotic regimen, and the use of other possible agents need to be incorporated.

Introduction:

- The spacing errors are highlighted. The sentences can be combined and written in the same paragraph.

Periodontitis and diabetes mellitus:

- The spacing errors are highlighted. The sentences can be combined and written in the same paragraph.
- References 27, 28 and 29 need to be explained elaborately with the appropriate citations.

Conclusion:

- The spacing errors are highlighted. The sentences can be combined and written in the same paragraph.
