Mastiff

National Cancer Institute

Source

National Cancer Institute. *Mastiff*. NCI Thesaurus. Code C53773.

The Old English Mastiff is very massive, powerful and muscular. It is one of the heaviest breeds; a male Mastiff can exceed 200 pounds. It has a short coat and small ears. There is a black mask around the eyes and nose no matter what the general coat color. The short coat comes in golden fawn, light fawn, brindle, silver, tiger, and apricot. Height: from 27-30 inches (69-76 cm.) Weight: about 150-160 pounds (68-72 kg.)
