The structure of the journal follows a standard format and makes it easy for readers to navigate the information presented. Here are the main components of a good journal structure:

Title: Should be clear and accurately describe the content of the journal.

Abstract: There is a summary of the research that includes the background, objectives, methodology, primary results, and conclusions.

Methodology: Describes in detail the methods used in the study, including the research design, population and sample, instruments used, and data analysis procedures.

Results: Presents the data and findings from the study, often with tables, graphs, and statistics.

Discussion: Interprets the results, explains how the findings relate to or differ from previous research, and their implications.
